Commissioner David Wright

Dear Commissioner Wright,

Please help the hundreds of thousands of South Carolinians who are struggling to make ends meet get free wireless phone service, now!

South Carolina has been hit hard by the economic downturn and the Public Service Commission has an obligation to make available programs that could help our state's residents. SafeLink, a program that provides a free phone and monthly airtime to eligible consumers and doesn't cost the state of South Carolina a dime, is one such program. SafeLink is the first-of-its-kind service offered by the wireless phone industry and I support the effort to make it, and similar programs, available in South Carolina. SafeLink will help struggling residents look for work and stay connected to friends and family! Furthermore, keeping connected could mean the difference between life and death in an emergency situation. Low income residents should not be denied this security.

Consumers in numerous states, such as New York, Illinois, North Carolina and Virginia, are already enjoying the benefits of SafeLink; it's time for South Carolina to have access to them as well.

We are facing unprecedented tough economic times. This innovative program will help struggling South Carolinians get back on their feet and contributing to a robust state economy.

I ask the Public Service Commission to make SafeLink available now!

Sincerely,  
Pam Aiken

Furthermore, keeping connected could mean the difference between life and death in an emergency situation. Low income residents should not be denied this security.

Consumers in numerous states, such as New York, Illinois, North Carolina and Virginia, are already enjoying the benefits of SafeLink; it's time for South Carolina to have access to them as well.

We are facing unprecedented tough economic times. This innovative program will help struggling South Carolinians get back on their feet and contributing to a robust state economy.

I ask the Public Service Commission to make SafeLink available now!

Sincerely,  
phyllecia whitlock

Commissioner David Wright

Dear Commissioner Wright,

Please help the hundreds of thousands of South Carolinians who are struggling to make ends meet get free wireless phone service, now!

South Carolina has been hit hard by the economic downturn and the Public Service Commission has an obligation to make available programs that could help our state's residents. SafeLink, a program that provides a free phone and monthly airtime to eligible consumers and doesn't cost the state of South Carolina a dime, is one such program. SafeLink is the first-of-its-kind service offered by the wireless phone industry and I support the effort to make it, and similar programs, available in South Carolina. SafeLink will help struggling residents look for work and stay connected to friends and family! Furthermore, keeping connected could mean the difference between life and death in an emergency situation. Low income residents should not be denied this security.

Consumers in numerous states, such as New York, Illinois, North Carolina and Virginia, are already enjoying the benefits of SafeLink; it's time for South Carolina to have access to them as well.

We are facing unprecedented tough economic times. This innovative program will help struggling South Carolinians get back on their feet and contributing to a robust state economy.

I ask the Public Service Commission to make SafeLink available now!

Sincerely,  
nakela bucholtz

Please help the hundreds of thousands of South Carolinians who are struggling to make ends meet get free wireless phone service, now!

South Carolina has been hit hard by the economic downturn and the Public Service Commission has an obligation to make available programs that could help our state's residents. SafeLink, a program that provides a free phone and monthly airtime to eligible consumers and doesn't cost the state of South Carolina a dime, is one such program. SafeLink is the first-of-its-kind service offered by the wireless phone industry and I support the effort to make it, and similar programs, available in South Carolina. SafeLink will help struggling residents look for work and stay connected to friends and family! Furthermore, keeping connected could mean the difference between life and death in an emergency situation. Low income residents should not be denied this security.

Consumers in numerous states, such as New York, Illinois, North Carolina and Virginia, are already enjoying the benefits of SafeLink; it's time for South Carolina to have access to them as well.

We are facing unprecedented tough economic times. This innovative program will help struggling South Carolinians get back on their feet and contributing to a robust state economy.

I ask the Public Service Commission to make SafeLink available now!

Sincerely,  
Latonya Gipson

Please help the hundreds of thousands of South Carolinians who are struggling to make ends meet get free wireless phone service, now!

South Carolina has been hit hard by the economic downturn and the Public Service Commission has an obligation to make available programs that could help our state's residents. SafeLink, a program that provides a free phone and monthly airtime to eligible consumers and doesn't cost the state of South Carolina a dime, is one such program. SafeLink is the first-of-its-kind service offered by the wireless phone industry and I support the effort to make it, and similar programs, available in South Carolina. SafeLink will help struggling residents look for work and stay connected to friends and family! Furthermore, keeping connected could mean the difference between life and death in an emergency situation. Low income residents should not be denied this security.

Consumers in numerous states, such as New York, Illinois, North Carolina and Virginia, are already enjoying the benefits of SafeLink; it's time for South Carolina to have access to them as well.

We are facing unprecedented tough economic times. This innovative program will help struggling South Carolinians get back on their feet and contributing to a robust state economy.

I ask the Public Service Commission to make SafeLink available now!

Sincerely,  
Jasmine Salmon

**To:** Chairman.Fleming; ViceChairman.Howard  
**Subject:** SafeLink

Dear Ms. Fleming,  
Dear Mr. Howard,

I saw the Ad in Monday's The State Newspaper regarding SafeLink for South Carolina.

I think that this is a bad idea. The poor in South Carolina need jobs. Not free cell phone service. Not endless federal handouts.

Cell phones are available cheaply through Walmart with prepaid minutes. They are attainable by most, if they so choose.

People have to be self reliant, not slaves to the system. Please do not enable the poor to stay poor and live off the tax payer. I am all for giving people a hand up but then they have to stand on their own.

Best regards,  
Ann Engeli  
Lexington, SC

Vice Chairman John Howard

Dear Vice Chairman Howard,

Please help the hundreds of thousands of South Carolinians who are struggling to make ends meet get free wireless phone service, now!

South Carolina has been hit hard by the economic downturn and the Public Service Commission has an obligation to make available programs that could help our state's residents. SafeLink, a program that provides a free phone and monthly airtime to eligible consumers and doesn't cost the state of South Carolina a dime, is one such program. SafeLink is the first-of-its-kind service offered by the wireless phone industry and I support the effort to make it, and similar programs, available in South Carolina. SafeLink will help struggling residents look for work and stay connected to friends and family! Furthermore, keeping connected could mean the difference between life and death in an emergency situation. Low income residents should not be denied this security.

Consumers in numerous states, such as New York, Illinois, North Carolina and Virginia, are already enjoying the benefits of SafeLink; it's time for South Carolina to have access to them as well.

We are facing unprecedented tough economic times. This innovative program will help struggling South Carolinians get back on their feet and contributing to a robust state economy.

I ask the Public Service Commission to make SafeLink available now!

Sincerely,  
mike rhodes

South Carolina has been hit hard by the economic downturn and the Public Service Commission has an obligation to make available programs that could help our state's residents. SafeLink, a program that provides a free phone and monthly airtime to eligible consumers and doesn't cost the state of South Carolina a dime, is one such program. SafeLink is the first-of-its-kind service offered by the wireless phone industry and I support the effort to make it, and similar programs, available in South Carolina. Safelink will help struggling residents look for work and stay connected to friends and family! Furthermore, keeping connected could mean the difference between life and death in an emergency situation. Low income residents should not be denied this security.

Consumers in numerous states, such as New York, Illinois, North Carolina and Virginia, are already enjoying the benefits of Safelink; it's time for South Carolina to have access to them as well.

We are facing unprecedented tough economic times. This innovative program will help struggling South Carolinians get back on their feet and contributing to a robust state economy.

I ask the Public Service Commission to make SafeLink available now!

Sincerely,  
Emily Epting

Chairman Elizabeth Fleming

Dear Chairman Fleming,

Please help the hundreds of thousands of South Carolinians who are struggling to make ends meet get free wireless phone service, now!

South Carolina has been hit hard by the economic downturn and the Public Service Commission has an obligation to make available programs that could help our state's residents. SafeLink, a program that provides a free phone and monthly airtime to eligible consumers and doesn't cost the state of South Carolina a dime, is one such program. SafeLink is the first-of-its-kind service offered by the wireless phone industry and I support the effort to make it, and similar programs, available in South Carolina. SafeLink will help struggling residents look for work and stay connected to friends and family! Furthermore, keeping connected could mean the difference between life and death in an emergency situation. Low income residents should not be denied this security.

Consumers in numerous states, such as New York, Illinois, North Carolina and Virginia, are already enjoying the benefits of SafeLink; it's time for South Carolina to have access to them as well.

We are facing unprecedented tough economic times. This innovative program will help struggling South Carolinians get back on their feet and contributing to a robust state economy.

I ask the Public Service Commission to make SafeLink available now!

Sincerely,  
Sherrie McQueen  
843 Issaqueena Tr.

**Sent:** Thursday, November 05, 2009 10:39 PM  
**To:** Chairman.Fleming; ViceChairman.Howard  
**Subject:** SafeLink

Dear Ms. Fleming,  
Dear Mr. Howard,

I saw the Ad in Monday's The State Newspaper regarding SafeLink for South Carolina.

I think that this is a bad idea. The poor in South Carolina need jobs. Not free cell phone service. Not endless federal handouts. Cell phones are available cheaply through Walmart with prepaid minutes. They are attainable by most, if they so choose. People have to be self reliant, not slaves to the system. Please do not enable the poor to stay poor and live off the tax payer. I am all for giving people a hand up but then they have to stand on their own.

Best regards,  
Ann Engeli  
Lexington, SC

Chairman Elizabeth Fleming

Dear Chairman Fleming,

Please help the hundreds of thousands of South Carolinians who are struggling to make ends meet get free wireless phone service, now!

South Carolina has been hit hard by the economic downturn and the Public Service Commission has an obligation to make available programs that could help our state's residents. SafeLink, a program that provides a free phone and monthly airtime to eligible consumers and doesn't cost the state of South Carolina a dime, is one such program. SafeLink is the first-of-its-kind service offered by the wireless phone industry and I support the effort to make it, and similar programs, available in South Carolina. SafeLink will help struggling residents look for work and stay connected to friends and family! Furthermore, keeping connected could mean the difference between life and death in an emergency situation. Low income residents should not be denied this security.

Consumers in numerous states, such as New York, Illinois, North Carolina and Virginia, are already enjoying the benefits of SafeLink; it's time for South Carolina to have access to them as well.

We are facing unprecedented tough economic times. This innovative program will help struggling South Carolinians get back on their feet and contributing to a robust state economy.

I ask the Public Service Commission to make SafeLink available now!

Sincerely,  
Deloris Elliott  
528 Murray ST.  
Marion, SC 29571
